Summary

Software Engineer with **10 months** of full-time experience and **3 internships**, building **REST APIs and microservices** in **Go, Python, and Node.js**. Builds **agentic AI** applications, including AI agents and RAG pipelines, with **LangGraph, LangChain, and MCP**; shipped an LLM-powered assistant to **1,000+ users**. Strong in **DSA** and **low-level system design**.

Experience

Trackier **Jan 2026 – Present**
Software Development Engineer 1 *Delhi, India (Remote)*

- Built a multi-cloud **Data Locker** (**AWS S3, GCP, Azure**) and the **email management system** for the AppTrove affiliate-marketing SaaS platform, ingesting campaign performance data (clicks, impressions) for client and internal reporting; used by **100+ external developers**.
- Built **CSNook** from **0 to 1**, a **Vitally-style CSM platform**: owned Health Scores, Segments, Surveys, Custom Fields, and a unified Template system; designed backend integrations with **8 third-party platforms** (Gmail, Slack, HubSpot, Salesforce, Jira, Fireflies, WhatsApp, Periskope) to automate CS workflows.
- Fixed broken endpoints and resolved **CORS** issues in the **AppTrove Docs** API layer via a custom **Node.js** proxy, extending support to **56 REST API** endpoints; set up **Jenkins** CI pipelines for staging and testing.

StockSensei **Aug 2025 – Dec 2025**
Software Engineer Intern *Bangalore, India*

- Led full-stack development of **stocksensei.in** from 0 to launch, serving **500+ users** on Day 1; designed **Python/FastAPI** REST APIs on a **PostgreSQL** backend and built 4 product pages in React + TypeScript.

EdgeVerve (Infosys) **Feb 2025 – Jul 2025**
Product Engineer Intern *Bangalore, India*

- Developed **Finacle Treasury** backend modules in **C++**, improving financial processing performance by **20%**; cut build times **˜30%** via **CMake** tooling and authored an adoption report accepted by the team.

Microsoft **May 2024 – Jun 2024**
Software Development Engineer Intern *Hyderabad, India*

- Built a **GenAI copilot** (**LLM + RAG**, Copilot Studio) answering **Fluent Design Language** queries at **90% accuracy**; deployed to **1000+ users** across internal Teams and Slack channels.
- Contributed to **Fluent UI V2** components/APIs for **Android** in **Kotlin** across Microsoft 365 apps.

Projects

AskYourBook | ***Go, LangChainGo, Qdrant, OpenAI API, REST APIs*** **Github**

- Built a **RAG**-based "chat with your PDF" backend in **Go**: a REST API ingests PDFs, splits text into chunks, generates **embeddings concurrently with goroutines**, and indexes them in the **Qdrant** vector database.
- Implemented **semantic search** by embedding user queries with the same model and retrieving top-k relevant pages via cosine similarity, passed as context to an **LLM** for grounded, multi-turn chat.

MedHelp | ***TypeScript, Node.js, Copilot Studio, C++, REST APIs***

- GenAI healthcare chatbot combining real-time **IoT sensor inputs** (SpO2, temperature, BMI) with LLM-driven diagnostics; **89% disease prediction accuracy**.

Skills

Languages: Go (Golang), C++, Python, TypeScript, JavaScript, SQL
Backend: REST API Design, Microservices, Kafka, Node.js, FastAPI
GenAI & Agents: LangChain, LangGraph, MCP, RAG, AI Agents, Prompt Engineering, LLM Evals, Qdrant
Databases: PostgreSQL, MySQL, MongoDB, ClickHouse | **Frontend:** React.js, Next.js, Tailwind
Cloud & DevOps: AWS, GCP, Docker, Jenkins, Git, Linux, Postman

Achievements

- **Codeforces** Specialist – **Profile** | **CodeChef** 4-Star, Max **1847** – **Profile** | **ICPC India Prelims 2024:** Rank **612**/3000+

Education

Dayananda Sagar College Of Engineering **Dec 2021 – Jul 2025**
B.E. Electronics and Communication Engineering *Bangalore, India*
